From: Henk van Roode
Subject: Dutch scientific re:

Further to our telephone conversation of last week please find herebelow the recipients of the funds made available by the NMA for scientific research and a description of the projects.

Please bear in mind that this is my translation in English from the Dutch titles. It may be that the translation is scientifically not correct, however it gives you an idea what the projects are about.

The Dutch Cancer Institute

Research into the genetic factors in the development of tumors in mouses.

The CIVO/TNO Institute

Continued study of the changes in the mucous membrane of the greater bronchi under influence of tobacco smoke.

The ENT Clinic of the Amsterdam Free University Academic Hospital
---
Research into the role of genotoxic factors in the development of head/throat carcinogens.

The Radiobiologic Institute of TNO

Reasearch into the influence of radon radiation and tobacco smoke on the development of experimentally created tumors.

Hope this information serves the purpose.

If you have any questions, please let me know.

Kind regards,

Henk van Roode
